

2009 King of the Mountain - Note

We normally have splits at both Cox's River (foot of the mountain) and Pluviometer (top of the mountain) and have a competition to rank runners based on their split time for the climb - called **King of the Mountain**.

Unfortunately in 2009, although all the equipment was working at the start of the race, the timing equipment at the Pluviometer developed a technical fault during the day and consequently lost all its data, so no KoM split this year. Sorry.
